

## **Flea Treatment Prep Sheet**

The following preparation must be completed prior to the start of any treatment in order for you to maintain the warranty of the service provided. Many of the procedures must be followed in order to comply with health department regulations.

### **General Preparations**

- All areas treated need to be vacuumed prior to our arrival.
- Leave areas accessible and pick up any miscellaneous item off the floors such as children's/pet toys.
- If marine tanks are present, disconnect aerator, and cover the pump/tank with wet towels.
- All live plants need to be removed, or covered with plastic
- Both parties will be ready to begin at the mutually predetermined start time.
- All pets must be removed from the home prior to the treatment.
- Home will need to be vacant for a period of 2 hours after the treatment is completed.

This is a general outline for the service, if additional prep items are needed the service tech will provide those at the time of service. Please direct any questions to your Service Technician.
